

Combining indicators of value
to
inform the library's assessment of eJournals

Klara Maidenberger
Assessment Librarian, University of Toronto Libraries

Assessment? Librarian?

Klara Maidenberg
Assessment Librarian
University of Toronto
Libraries

Library assessment is a set of processes undertaken by library staff to measure whether resources and services have met library users' expectations and identify how a library might need to improve.¹

Assessment Librarians use traditional research methods, UX methodologies, data analysis and other approaches to ensure that the library's collections, services and spaces reach their goals, meet user needs and continue to improve.

Library collections – scholarly journals

- **Scholarly journals** are communication venues for an audience of researchers, not for the general public. Each has a focus on a specific field or discipline.
- Publishers are the ‘vendors’ who organize, finance and produce scholarly journals. Typically, a publisher will have anywhere from 5 to 5000 journals that they produce.
- Once upon a time, scholarly journals published in print.
- In recent decades, they have increasingly moved to an electronic format, and are accessible online to subscribers through IP authentication.

Library collections – scholarly journals

- Publishers incur costs for the journals they produce and want to recoup that cost by licensing access to the journals to readers (individuals, companies, or libraries).
- Some publishers operate as not-for-profit and some are for-profit.
- In either case, access to a journal's full-text content is protected by a paywall, and enabled for recognized IP ranges from paying customers.

How the library acquires eJournals

The Big Deal

The Big Deal

“A comprehensive licensing agreement in which a library or library consortium agrees to buy electronic access to all or a large portion of a publisher’s journals for a cost based on expenditures for journals already subscribed to by the institution(s) plus an access fee”

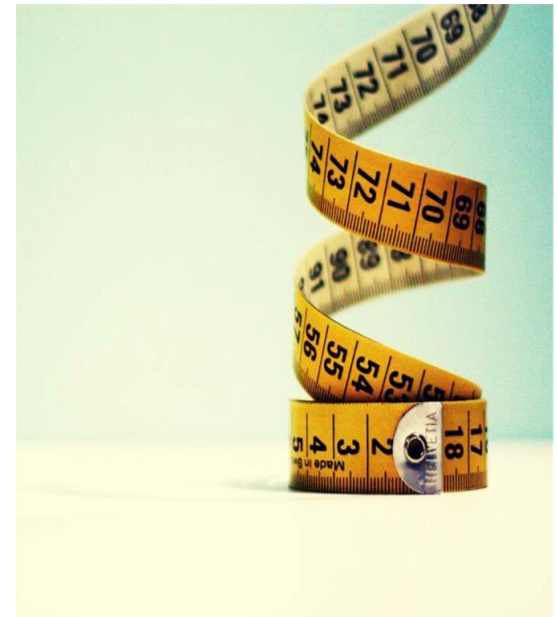

(Frazier, 2005)

The Big Deal

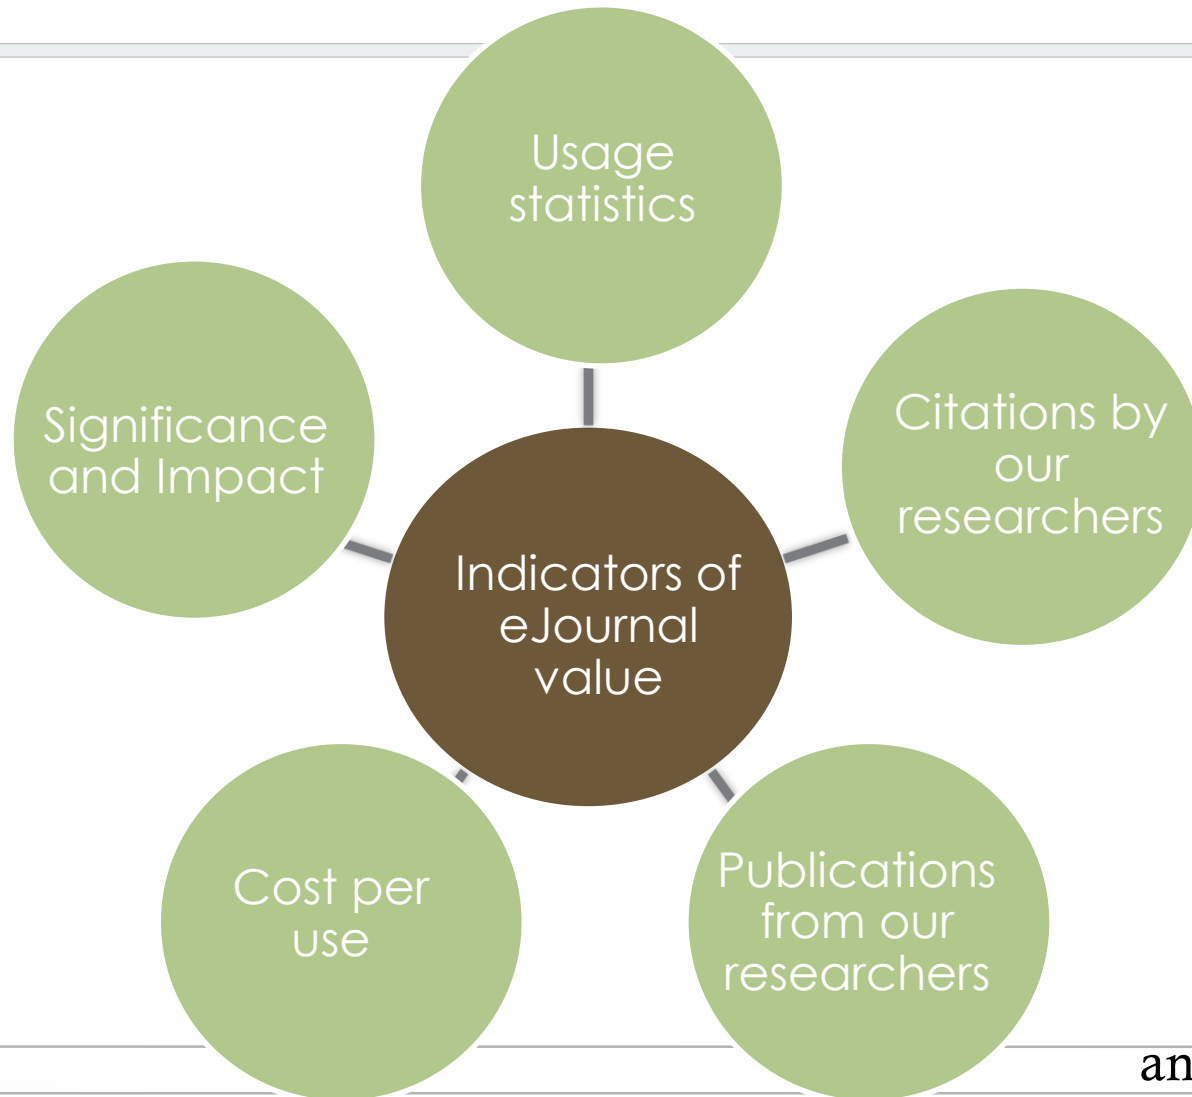

Collections Assessment

The practice of measuring and determining the performance, quality or value of a product or resource.

Indicators of Value

We assess relative value by utilizing metrics (=proxies for value).

and more...

Indicator 1: Usage of eJournals

Counting Online Usage of Networked Electronic Resources (COUNTER)

- The industry standard for recording and reporting electronic resources use
- Governs formatting of usage reports
- Ensures that usage from different vendors/platforms can be compared
- Reports show what is being accessed and how much

Every indicator of value is flawed

- Reliance on a single indicator can lead to skewed or inaccurate assessment
- The use of several indicators will better illuminate the value of a product

“To use usage statistics as an absolute criterion for judging value is dangerous and misunderstands the scholarly system”

Singleton, A. (2010). Why Usage is Useless. *Learned Publishing*, 23(3),179-184.

Indicator 2:
Count of publications
by our researchers

Faculty Publications Data: definition

A list of records representing published scholarly artifacts where at least one author is affiliated with UofT

Uncovering correlation between train delay and train exposure to bad weather

By: Ling, XM (Ling, Ximan)^[1]; Peng, Y (Peng, Yang)^[1]; Sun, SL (Sun, Shilin)^[1]; Li, PP (Li, Panpan)^[2]; Wang, P (Wang, Pu)^[1]

Putting the two together

Match on: ISSN

INTERNATIONAL
STANDARD
SERIAL
NUMBER
INTERNATIONAL CENTRE

What is an ISSN?

An ISSN is an 8-digit code used to identify newspapers, journals, magazines and periodicals of all kinds and on all media—print and electronic.

- Which publications are concerned by an ISSN?
- What form does an ISSN take?
- What is its role?
- Where is it displayed?

Which publications are concerned by an ISSN?

An ISSN (International Standard Serial Number) identifies all continuing resources, irrespective of their medium (print or electronic):

- newspapers,
- annual publications (reports, directories, lists, etc.),
- journals,

Desired outcomes

- An interface that, for a given publisher or journal, returns the number of total articles downloaded and the total number of artifacts published by UofT affiliated individuals.
- A ranked list of the most heavily read publishers and journals.
- A ranked list of the top journals and publishers where our researchers publish.
- Proportion of all downloads generated by each publisher. Does it change year to year?
- Enhance the usage statistics reports by bringing in a major subject classification for each journal. Then, report total eJournal use frequencies by subject category in each year.
